[Canada. Statistics Canada]

BUSINESS REGISTER ARRAYIntroduction

The Business Register makes available a set of tables which reflects the number of statistical establishments in Canada. These tables contain counts for Canada and each province or territory, by industrial activity and by employment size range. These tables are produced every six months (year-end and mid-year).

These counts are different from those prepared before Cycle 148. The difference is that this set of counts is based on the number of 'statistical establishments' in Canada instead of being based on the number of 'legal entities' or equivalent for the non-incorporated businesses.

The 'statistical establishment' should not be confused with the legal entity or place of business. For example, one legal entity, especially for large and complex organizations, could be divided into more than one statistical establishment in order to compile data by industry. In many cases, that one statistical establishment could, in turn, represent more than one place of business.

Even though this change is significant in terms of definition, in reality all but approximately 3,000 businesses in Canada are single-establishment companies. These 3,000 corporations represent approximately 15,000 statistical establishments, mainly in the area of manufacturing and public administration.

We would like to emphasise that the Business Register is primarily engaged in developing survey frames. These tables are not part of Statistics Canada publication program and, therefore, are in no way to be considered official Statistics Canada figures. We recommend, therefore, that the tables be used with caution, as they were not developed to meet specific modelling or analytical requirements.

Limitations

The tables cover all industrial activity in Canada but are limited to the employer portion of the business world. Therefore, an activity such as a corner store that is owner/operated, with no paid employees, would be excluded from these counts.

These counts are not an indication of number of 'locations' of stores, branches, plants, etc. For example, a bank could be considered as a single-establishment company, counted only once in the province in which the head office is located, with no indication of the number of bank branches across the country. The employment size code would indicate the range of number of employees in total for the bank.

There is, in our opinion, a certain degree of overstatement, in the counts. This is due in most part to the fact that the main sources of information which we use to update our file have a substantial built-in timelag in identifying inactive businesses. In addition, the file is subject to the periodicity and irregularities of updates which could affect year-to-year comparison of counts.

Standard Industrial Classification

The 1970 Standard Industrial Classification codes are used in these tables. A description of these codes is contained in the Standard Industrial Classification Manual, Revised 1970, Catalogue No. 12-501, and may be obtained through all regular Statistics Canada publication outlets.

However, for those establishments engaged in agricultural activities, it has been determined that, for Statistics Canada's purposes, the Standard Industrial Classification code is to be applied at the two-digit level only. All activities which would normally have the 1970 SIC in the range of 001 - 019 are now coded 010, the right-most position being zero-filled. Similarly, the 1970 SIC 021 is now coded 020.

A new standard, the 1980 standard, has been introduced. However, until the conversion process has been completed on the Business Register, we will continue to publish these tables using the 1970 Standard.

Employment Size Codes

The Employment Size codes give a range of employees only. Most are self-explanatory with the following exceptions:

00 - This size code indicates either:

- (a) that a business had employees and currently does not or
- (b) that the business does not currently have employees but expects to have employees within the next 12 months.

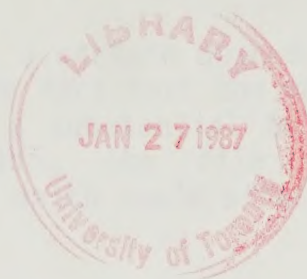

Neither of these is considered in the non-employer business sector (owner/operated, partnerships, etc.).

20 (1-19) - This size code is assigned to businesses which are known to have employees in the range of 1 - 19 but for which a more detailed size code cannot be assigned.

99 (Unknown) - This is similar to code 20 but with the difference that no information is available to classify the business to an employment size range. Experience has shown that 90% of the businesses will fall within the range of 1 - 19 employees.

BUSINESS REGISTER ARRAY

Introduction

The Business Register makes available a set of tables which reflects the number of statistical establishments in Canada. These tables contain counts for Canada and each province or territory, by industrial activity and by employment size range. These tables are produced every six months (year-end and mid-year).

These counts are different from those prepared before Cycle 148. The difference is that this set of counts is based on the number of "statistical establishments" in Canada instead of being based on the number of "legal entities" or equivalent for the non-incorporated businesses.

The "statistical establishment" should not be confused with the legal entity or place of business. For example, one legal entity, especially for large and complex organizations, could be divided into more than one statistical establishment in order to compile data by industry. In many cases, that one statistical establishment could, in turn, represent more than one place of business.

Even though this change is significant in terms of definition, in reality all but approximately 3,000 businesses in Canada are single-establishment companies. These 3,000 corporations represent approximately 15,000 statistical establishments, mainly in the area of manufacturing and public administration.

We would like to emphasize that the Business Register is primarily engaged in developing survey frames. These tables are not part of Statistics Canada publication program and, therefore, are in no way to be considered official Statistics Canada figures. We recommend, therefore, that the tables be used with caution, as they were not developed to meet specific modelling or analytical requirements.

Limitations

The tables cover all industrial activity in Canada but are limited to the employer portion of the business world. Therefore, an activity such as a corner store that is owner/operated, with no paid employees, would be excluded from these counts.

These counts are not an indication of number of "locations" of stores, branches, plants, etc. For example, a bank could be considered as a single-establishment company, counted only once in the province in which the head office is located, with no indication of the number of bank branches across the country. The employment size code would indicate the range of number of employees in total for the bank.

There is, in our opinion, a certain degree of overstatement, in the counts. This is due in most part to the fact that the main sources of information which we use to update our file have a substantial built-in timelag in identifying inactive businesses. In addition, the file is subject to the periodicity and irregularities of updates which could affect year-to-year comparison of counts.

Standard Industrial Classification

The 1970 Standard Industrial Classification codes are used in these tables. A description of these codes is contained in the Standard Industrial Classification Manual, Revised 1970, Catalogue No. 12-501, and may be obtained through all regular Statistics Canada publication outlets.

However, for those establishments engaged in agricultural activities, it has been determined that, for Statistics Canada's purposes, the Standard Industrial Classification code is to be applied at the two-digit level only. All activities which would normally have the 1970 SIC in the range of 001-019 are now coded 010, the right-most position being zero-filled. Similarly, the 1970 SIC 021 is now coded 020.

A new standard, the 1980 standard, has been introduced. However, until the conversion process has been completed on the Business Register, we will continue to publish these tables using the 1970 Standard.

Employment Size Codes

The Employment Size codes give a range of employees only. Most are self-explanatory with the following exceptions:

00 - This size code indicates either:

- (a) that a business had employees and currently does not or
- (b) that the business does not currently have employees but expects to have employees within the 12 months.

Neither of these is considered in the non-employer business sector (owner/operated, partnerships, etc).

99 - (Unknown) - This size code is assigned to businesses where no information is available to classify the business to an employment size range. Experience has shown that 90% of the businesses will fall within the range of 1 - 19 employees.

EMPLOYMENT SIZE CODES ARE AS FOLLOWS:

00	NONE
01	1 to 4
02	5 to 9
03	10 to 19
04	20 to 49
05	50 to 99
06	100 to 199
07	200 to 499
08	500 to 999
09	1,000 to 1,499
10	1,500 to 2,499
11	2,500 to 4,999
12	OVER 5,000
20	UNKNOWN (1 - 19)
99	UNKNOWN
